The Paper Birds

Juxtaposing Texts

- In groups, assign each person with a different style of text to write. These are some of our favourites…

    - Write a fairy story – loosely connected with your topic, incorporate the language, style and conventions associated with a typical fairy story
    - Voiceover for an advert – create the voiceover for a product or thing associated with your topic – do you take a pessimistic or sarcastic approach, or do you stay true to persuasive marketing techniques?
    - List – generate a list where the prefix you repeat throughout is 'I want to live in a world that…'
      Use the list to explore both the personal and political.
    - Description of a setting or location – choose a place associated with your theme and use clear descriptive language to bring that scene to life.
    - Personal experience / personal opinion / fact and statistics associated with the topic. (Sometimes I invite people to google or I might bring in an article of fact sheet).
