# Overview

## In this document

Students apply knowledge of weather vocabulary to determine which places in the world are being described through typical weather conditions.

- 1) Print-out slide 4 and give to pairs of students in cut-out text strips.
- 2) Show slide 1 and ask students to lay out the text strips on the table in the same order as the places on the slide.
- 3) Reveal the answers using fly-out animation clicks.

As a follow-up task, students use some of the key structures and vocabulary to create a similar text about their own local area.
